Office Action Summary

Application No.

09/557,382

Applicant(s)

TROSSEN ET AL.

Examiner

Vanel Frenel

Art Unit

3626

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 April 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-25 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-25 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Notice to Applicant

1. This communication is in response to the Appeal Brief filed on 04/25/05 and a Request for Continued Examination filed on 10/05/04. Claims 1-25 are presented for examination. Claims 1-25 are pending.

2. In view of the Appeal Brief filed on 04/25/05, PROSECUTION IS HEREBY REOPENED as set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

- (1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
- (2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-25 are rejected under 35 U.S.C. 103(a) as being unpatentable

over Joao (6,283,761) in view of Andreiko et al (5,683,243).

(A) As per claim 1, Joao discloses an dental treatment planning system, comprising: an input form to receive one or more dental patient inputs (Col.25, lines 1-7). Joao does not explicitly disclose an engine adapted to receive the dental patient data from the input form and validating the dental patient data in a predetermined sequence. However, this feature is known in the art, as evidenced by Andreiko. In particular, Andreiko suggests an engine adapted to receive the dental patient data from the input form and validating the dental patient data in a predetermined sequence (See Andreiko Col.21, lines 48-67 to Col.22, line 56).

It would have been obvious to one of ordinary skill in the art at time of the invention to have included the feature of Andreiko within Joao's apparatus with the motivation of providing a custom orthodontic appliance which fabricated under the control of a computer directly from data from the teeth and/or jaw of a patient or a model thereof. The appliance so formed, when connected to the teeth of the patient to precise calculated finish positions without the need for the orthodontist to bend archwires over the course of the treatment. As a result, the orthodontist's time is conserved, the treatment of the patient is achieved in a shorter amount of time and the finish positions of the teeth are more nearly ideal (See Andreiko Col.6, lines 20-30).

(B) As per claim 2, Andreiko discloses the system wherein the engine prompts the user for additional data based on previous entries (Col.12, lines 48-67 to Col.13, line 53; Col.33, lines 33-65).

The motivation for combining the respective teachings of Joao and Andreiko are as discussed above in the rejection of claim 1, and incorporated herein.

(C) As per claim 3, Andreiko discloses the system wherein the treatment includes a diagnostic phase, a goal phase and a treatment path determination phase (Col.13, lines 20-42).

The motivation for combining the respective teachings of Joao and Andreiko are as discussed above in the rejection of claim 1 , and incorporated herein.

(D) As per claim 4, Andreiko discloses the system wherein the engine checks validity for data entered intraphase (Col.13, lines 20-42).

The motivation for combining the respective teachings of Joao and Andreiko are as discussed above in the rejection of claim 1 , and incorporated herein.

(E) As per claim 5, Andreiko discloses the system wherein validity is determined by crosschecking against a mutually exclusive condition (Col.14, lines 54-67 to Col.15, line 37).

The motivation for combining the respective teachings of Joao and Andreiko are as discussed above in the rejection of claim 1, and incorporated herein.

(F) As per claim 6, Andreiko discloses the system wherein the engine checks validity for data entered interphase (Col.13, lines 20-42).

The motivation for combining the respective teachings of Joao and Andreiko are

Art Unit: 3626

as discussed above in the rejection of claim 1 , and incorporated herein.

(G) As per claim 7, Andreiko discloses the system wherein the engine checks whether the treatment results in an improvement in the patient (Col.3, lines 51-58*, Col.6, lines 20-33)

The motivation for combining the respective teachings of Joao and Andreiko are as discussed above in the rejection of claim 1, and incorporated herein.

(H) As per claim 8, Andreiko discloses the system wherein the engine checks whether the treatment meets an efficiency guideline (Col.3, lines 36-64).

The motivation for combining the respective teachings of Joao and Andreiko are as discussed above in the rejection of claim 1 , and incorporated herein.

(I) As per claim 9, Andreiko discloses the system wherein the engine checks whether the treatment meets a prudence guideline (Col.3, lines 36-64).

The motivation for combining the respective teachings of Joao and Andreiko are as discussed above in the rejection of claim 1, and incorporated herein.

(J) As per claim 10, Andreiko discloses the system further comprising an appliance having one or more properties, wherein the engine checks the treatment plan against properties of the appliance (Col.3, lines 59-67 to Col.4, line 37 to Col.14, lines 4-49).

The motivation for combining the respective teachings of Joao and Andreiko are

as discussed above in the rejection of claim 1, and incorporated herein.

(K) As per claim 11, Joao discloses a virtual health-care treatment system, comprising: a network to communicate information relating to the community, one or more patients coupled to the network (Co1.18, lines 50-65, Col.20, lines 40-50)., one or more treating professionals coupled to the network (Col.14, lines 13-67 to Col.15, line 17; Col.20, lines 13-67), and a server coupled to the network (Col.14, lines 49-67). Joao does not explicitly disclose validating data entry relating to a patient treatment plan to an input form in a predetermined sequence and visualizing patient data in response to a user request.

However, this feature is known in the art, as evidenced by Andreiko. In particular, Andreiko suggests validating data entry relating to a patient treatment plan to an input form in a predetermined sequence and visualizing patient data in response to a user request (See Andreiko, Col.21, lines 19-67., Col.24, lines 14-20).

It would have been obvious to one of ordinary skill in the art at the time of the invention to have included the feature of Andreiko within the system of Joao with the motivation of providing a custom orthodontic appliance which fabricated under the control of a computer directly from data from the teeth and/or jaw of a patient or a model thereof. The appliance so formed, when connected to the teeth of the patient to precise calculated finish positions without the need for the orthodontist to bend archwires over the course of the treatment. As a result, the orthodontist's time is conserved, the treatment of the patient is achieved in a shorter amount of time and the finish positions

of the teeth are more nearly ideal (See Andreiko Col.6, lines 20-30).

(L) As per claim 12, Andreiko discloses the community wherein the treating professional views one or more of the following patient data visualization over the network'. a right buccal view', a left buccal view; a posterior view', an anterior view', a mandibular occlusal view; a maxillary occlusal view', an overjet view', a left distal molar view', a left lingual view', a lingual incisor view; a right lingual view; a right distal molar view; an upper jaw view', and a lower jaw view (See Andreiko Col. 1, lines 33-65., Col.15, lines 19-55).

The motivation for combining the respective teachings of Joao and Andreiko are as discussed above in the rejection of claim 1, and incorporated herein.

(M) As per claim 13, Joao discloses the community wherein the treating professionals include dentists or orthodontists (Col.17, lines 25-30).

(N) As per claim 14, Joao discloses the community further comprising one or more partners coupled to the network (Col.16, lines 6-67; Col.17, line 1-31; Col.19, lines 32-67).

(O) As per claim 15, Joao discloses the community wherein the patients and the treating professionals access the server using browsers (Col.40, lines 13-67 to Col.41, line 32).

(P) As per claim 16, Joao discloses a method for performing dental treatment planning, comprising: receiving one or more dental patient inputs (Col.25, lines 1-67). Joao does not explicitly disclose validating the dental patient data in a predetermined sequence.

However, this feature is known in the art, as evidenced by Andreiko. In particular, Andreiko suggests an engine adapted to receive the dental patient data from the input form and validating the dental patient data in a predetermined sequence (See Andreiko Col.21, lines 48-67 to Col.22, line 56).

It would have been obvious to one of ordinary skill in the art at time of the invention to have included the feature of Andreiko within Joao's apparatus with the motivation of providing a custom orthodontic appliance which fabricated under the control of a computer directly from data from the teeth and/or jaw of a patient or a model thereof. The appliance so formed, when connected to the teeth of the patient to precise calculated finish positions without the need for the orthodontist to bend archwires over the course of the treatment. As a result, the orthodontist's time is conserved, the treatment of the patient is achieved in a shorter amount of time and the finish positions of the teeth are more nearly ideal (See Andreiko Col.6, lines 20-30).

(Q) Claims 17-25 recite the underlying process of the elements of claims 2-10, and respectively. As the various elements of claims 2-10 have been shown to be either disclosed by or obvious in view of the collective teachings of Joao and Andreiko, it is

readily apparent that the apparatus disclosed by the applied prior art performs the recited underlying functions. As such, the limitations recited in claims 17-25 are rejected for the same reasons given above for system claims 2-10, and incorporated herein.

Response to Arguments

5. Applicant's arguments filed on 04/25/05 with respect to claims 1-25 has been fully considered but they are not persuasive.

6. Applicant's arguments filed 04/25/05 have been fully considered but they are not persuasive. Applicant's arguments will be addressed hereinbelow in the order in which they appear in the response filed 04/25/05.

(A) At pages 3-11 of the 04/25/05 response, Applicant argues that the features in the 09/22/03 amendment are not taught by or suggested by the applied references.

In response, all of the limitations which Applicant disputes as missing in the applied references, in the 04/25/05 amendment, have been fully addressed by the Examiner as either being fully disclosed or obvious in view of the collective teachings of Joao and/or Andreiko based on the logic and sound scientific reasoning of one ordinarily skilled in the art at the time of the invention, as detailed in the remarks and explanations given in the preceding sections of the present Office Action and in the prior Office Action and incorporated herein. One cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981), *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

In addition, the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference', nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited but not applied art teaches method for use in dental articulation (6,322,359), methods for manufacturing a dental implant drill guide and a dental implant superstructure (5,725,376), and method and apparatus for designing an orthodontic apparatus to provide tooth movement (6,350,120).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vanel Frenel whose telephone number is 571-272-6769. The examiner can normally be reached on (Monday-Tuesday) from 6:30am-5:00pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Thomas can be reached on 571-272-6776. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-7687 for regular communications and 703-305-7687 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-
